

New Source Review newspaper advertisements for construction permit applications, February 22, 2018. The following public notices have been published in the newspapers listed below each advertisement. These newspaper advertisements for construction permit applications will be or were published on one of the following dates: February 16, 2018, February 18, 2018 or February 22, 2018. Public notices are generally published every week. The previous publication of public notices was February 15, 2018.

#### PUBLIC NOTICE

The Tennessee Division of Air Pollution Control (TDAPC) has received requests for construction and/or modification of air contaminant sources as noted below. The proposed construction and/or modification is subject to part 1200-03-09-.01(1)(h) of the Tennessee Air Pollution Control Regulations, which requires a public notification and 30-day public comment period. Interested parties may express their comments and concerns in writing to Mrs. Michelle W. Owenby, Director, Division of Air Pollution Control, William R. Snodgrass Tennessee Tower, 312 Rosa L. Parks Avenue, 15<sup>th</sup> Floor, Nashville, Tennessee 37243 within thirty (30) days of the date of this notice. Questions concerning a source may be addressed to the assigned Division personnel at the same address or by calling 615-532-0554.

Any individuals with disabilities who wish to participate in these proceedings or to review these filings should contact the Tennessee Department of Environment and Conservation to discuss any auxiliary aids or services needed to facilitate such participation. Such initial contact may be in person, by writing, telephone, or other means, and should be made no less than ten (10) days prior to the hearing, or the date such party intends to review such filings, to allow time to provide such aid or service. Contact the Tennessee Department of Environment and Conservation ADA Coordinator, 2<sup>nd</sup> Floor, William R. Snodgrass Tennessee Tower, 312 Rosa L. Parks Avenue, Nashville, TN 37243, (866) 253-5827 (toll free) or (615) 532-0200. Hearing impaired callers may use the Tennessee Relay Service (1-800-848-0298).

The applicant is Crab Orchard Stone Company, Inc. with a mailing address of P.O. Box 950, Crossville, TN 38557. They seek to obtain an air contaminant permit (Division identification number 18-0043-04 / 973753) for construction of a Sandstone Rock Crushing Operation located at Rock Quarry Road, Crossville, TN 38557. The proposed operation would consist of a Track Mounted Jaw Crusher and a Track Mounted Conveyor for the Sandstone Rock Crushing Operation that would be powered by two 50hp and 275hp exempt Diesel-Fired Engines. There would be physical construction. Regulated air contaminants would be emitted by this source. Wet Suppression would be used for pollution control. Mr. Younes Aleali is the assigned Division person.

For the Cumberland County "Crossville Chronicle"-- publish once on Friday, February 16, 2018.

---

The applicant is UST, Inc. with a mailing address of 1427 North Main Street, Mt. Pleasant, TN 38474. They seek to obtain an air contaminant permit (Division identification number: 60-0272-11/973764) for construction of one (1) 82 kw John Deere diesel-fired emergency engine located at the same address. This existing source consists of one (1) 110 HP diesel-fired emergency engine powering an emergency fire pump. Because of the amount and type of emissions, the use of pollution control equipment is not proposed. There would not be physical construction. Regulated air contaminants would be emitted at this facility. Mr. Chris Meek is the assigned Division person.

For the Maury County "Daily Herald"--publish once on Thursday, February 22, 2018.

---

The applicant is Vonore Fiber Products LLC with a mailing address of 200 Industrial Drive, Vonore, TN 37885. They seek to obtain an air contaminant permit for an agricultural fiber pulping operation (Division identification number: 62-0211-01, 02, 03, 04, 05/ 73491) located at the same address. The applicant has agreed to be subject to limitations to restrict emissions of volatile organic compounds and hazardous air pollutants below major source (Title V) threshold limits. The facility operations will consist of five (5) emission sources. Source 01 will be a straw processing operation. Baled straw will be unloaded from truck to storage and straw will be conveyed from storage to a de-baler and straw chopper. A baghouse will be used for pollution control. Source 02 will be a straw pulping and washing operation. Chopped straw will be mixed and pulped in mixing tanks, and then the pulp will be washed. A thermal oxidizer will be used for pollution control. Source 03 will be a cleaned pulp processing operation. The process will involve sizing operations, cleaning, dewatering, and sheeting. Washed pulp will be reduced in size and converted into product sheets. Source 04 will be co-products processing. Filtrate that is not recycled in the process will be transferred to an evaporator feed tank and then through a multiple effect evaporator system to increase the percentage of solids in the co-product. The recovered evaporator condensate will be recycled to the pulping process. Source 05 will be support equipment. A 40.88 million Btu per hour natural gas fired boiler with an economizer will be used to produce hot water and steam for facility operations. A cooling tower will supply cooling water for the surface condensers in the co-products process. A mobile tub grinder (an insignificant activity) will be used to grind off-specification straw for recycling to the process or for mulch. Regulated air contaminants will be emitted by these sources. There will be physical construction. Mr. John Trimmer is the assigned Division person.

For the "Monroe County Advocate & Democrat"-- publish once on Sunday, February 18, 2018.
